

BTEC INFORMATION TECHNOLOGY

Achieving Excellence Together

Edexcel BTEC Level 3 Certificate in Information Technology

Entry Requirements: Five Grade 'C's, or above, at GCSE Level including English or Level 2 pass in I.C.T.

Course Description

This qualification is equivalent to 1 A Level. The course is a two year course with the following units being covered:

Information Technology Systems - Learners study the role of computer systems and the implications of their use in personal and professional situations. Information technology (IT) systems have a significant role in the world around us and play a part in almost everything we do. Having a sound understanding of how to effectively select and use appropriate IT systems is of great benefit personally and professionally

Creating Systems to Manage Information - Learners study the design, creation, testing and evaluation of a relational database system to manage information. Relational databases are widely used to manage and process data, in order to produce information to support many business processes as well as our own social lives. From the smallest in-house systems to stock control systems for large online retailers, databases are repositories of information that are a significant part of organisational operating requirements.

Course Description Continued ...

Using Social Media in Business - Learners explore how businesses use social media to promote their products and services. Learners also implement social media activities in a business to meet requirements.

Website Development - Learners investigate website development principles and they design and develop a website using scripting languages.

Method(s) of Assessment

Information Technology Systems - Externally assessed by a written examination.

Creating Systems to Manage Information - Externally assessed by a set task which will be completed under exam conditions for 10 hours in a 1-week period, which is arranged over a number of lessons.

Using Social Media in Business - Assessed by coursework of written and digital tasks.

Website Development - Assessed by coursework portfolio of written and digital tasks.

Progression

This course gives students a wide choice of progression options into further study, apprenticeships or relevant employment.

Students who successfully complete the qualification will be well equipped to move onto degrees in related subjects such as Computer Science, Information Systems, Multimedia, Software Engineering, Computer Networking and Business and Information Management.
