Dear Parents and Carers

Re: Year 7 Home Learning

I would like to share with you the format of the Science Home Learning Project which Year 7 students will be completing this half-term. The project has been designed to engage students with a range of topics through completion of practical tasks and experiments.

Each week of the project, students will be set a task to complete on the topics detailed below. Your child's science teachers will hand out any necessary equipment to ensure that there is no problem with completing the homework, and will also ensure that the details of all experiments are on the Show My Homework app and website.

The tasks will be set each week and will need to be completed by a specified date, so that students can share and discuss the experiment they completed with their class.

The schedule for experiments within the project is as follows:

W/B	Teacher One	Teacher Two
8/1	Paper Planes	Static and Water
15/1	Floating Paperclip	Chromatography
22/1	Cress Seeds	Balloon Rocket
5/2	Soap Boat	Benham's Disk
12/2	Cornflour	Cartesian Diver

Should you have any concerns about the projects, please do not hesitate to contact me.

Yours faithfully

Geoffrey Bagshaw
