Dear Parents and Carers

Re: Year 10 Science Revision Guides

As you will be aware, the new GCSE grading system has come into place in Science, and this means we also have a new curriculum. This is more detailed and slightly longer, so we have been advising students to start revision early.

As a department we are allowing students to borrow revision guides to help this. These will cover the entire Science curriculum for Year 10 and 11, but need to be handed back at the end of Year 11. We are also aware some students will want the opportunity to purchase these revision guides from us, so have made these available for half the retail price. This will mean that they can be written in, notes added and anything else that may help with exam preparation. These guides will be useful for the entirety of the GCSE period, up until Year 11. Guides can be purchased from the library, by seeing the librarian.

An overview of topics will be available on the website and the BBC Bitesize website has several good revision tools to help. Should you have any questions or concerns about the exams please do not hesitate to contact me.

Yours faithfully

Geoffrey Bagshaw

Mr G Bagshaw
Deputy Head of Science
